

REINFORCED OIL SEALS FOR OUTPUT SHAFT

The reinforced seal can be done depending on the gearbox size by means of two oil seals or through the standard oil seal with VRM ring. The difference of the two solutions is explained on the drawings.

The helical gear reducers from size 060 to size 140 (except for single stage) in V1/ V5 mounting position, are already equipped with 2 oil seals as standard.

On request the gear reducer can be supplied with fluoroelastomer FPM (FKM) seals.
